E36 Heatshield (323i, 325i, 328i) Installation guide

1. Remove the stock airfilter box (if you didn't already).
2. Install the large bracket next to the headlight in the existing holes.

3. Install the shortest bracket onto the chassis as follows:

4. Install the heatshield by mounting it to the front bracket with two bolts, and to the rear bracket with one bolt.

5. Two optional brackets are included to mount your air filter tube of choice. Done!
